

Enhancing the collaborative culture in Workplace

WABI BOT

Workplace
by facebook

Through Artificial Intelligence and Machine Learning we created the first bot that promotes teamwork and co-creation in your organization

Find collaborators who can help you

- Do you need help to complete a task?
- Would you like to find the expert in your company?

From the information of profiles, preferences and activities, **our bot can find and contact** you with the colleagues that can collaborate to complete your task better.

Wabi facilitates the process of requesting help and will notify you when your partner is available to collaborate.

Find out what colleagues need help

WABI will show you the list of partners and the topics they need help with.

Thanks to its **learning engine**, you can register new concepts for its availability as shared knowledge.

Learn more about your co-workers

Knowing your colleagues, what they are working on, their knowledge, skills and tastes is the basis for teamwork.

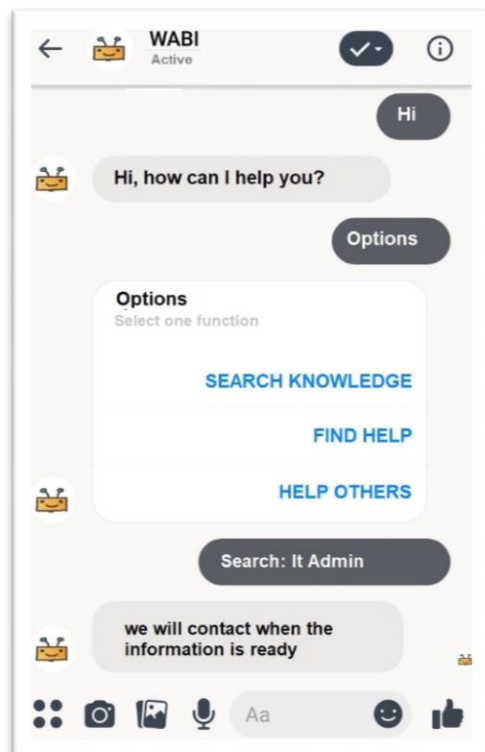

From the tasks carried out, skills and training WABI will help you to know your colleagues better

Search and find knowledge

Our bot can help you find the information you need to complete your tasks. WABI can connect to diverse sources of knowledge, go through wikis and read documents and information from multiple systems.

WABI works in offline mode so you can leave your query and continue with another activity. He will let you know when he has the information you need

It is the ideal tool to take advantage of the knowledge of an organization focusing on micro themes according to demand.
